Visa Status : US Permanent Resident

Work Experience

Forecasting Expert, Institute for Regional Forecasting, Houston — Apr 2026 - present
- Consulting for the City of Houston and Houston METRO, tasked with providing periodic forecasts of Houston area employment and sales tax revenue.
- Conduct scenario analysis for events.

Instructional Assistant Professor, University of Houston, Houston — Aug 2026 - present
- Teach undergraduate courses on Time Series Econometrics, Forecasting and Data Analysis.

Summer Associate, Analysis Group, New York — Jun 2025 - Aug 2025
- Worked in Litigation Consulting on cases related to Transfer Pricing, Securities Class Action, and Damages Analysis.
- Created an app that uses an LLM to efficiently classify case documents based on content.

Teaching Assistant, University of Houston — 2021 - 2026
- Nominated in 2024 and 2025 for the University's Graduate Student Employee Award.
- Conducted weekly tutorials for 3 Ph.D courses in **Statistics** and **Econometrics** covering Panel Data, GARCH, VAR, VECM etc.

Research Assistant, University of Houston — 2022 - 2025
- Developed **MATLAB** script to calculate Value-added exports from World Input-Output database.
- Calculated interest rates periodically to update commentary on US monetary policy.

Assistant Professor, Symbiosis International University, Pune. — 2016 - 2018
- Taught undergraduate courses on **Econometrics** and **Statistics**.

Program Officer, Public Affairs Centre, Bangalore. — 2015 - 2016
- Implemented projects promoting citizen monitoring of infrastructure development, trained data surveyors and co-wrote research reports.

Summer Analyst, Goldman Sachs, Bangalore. — May 2012 - Jun 2012
- Analyzed unstructured data on errors raised by the software managing employee expenses, to identify changes to be made in SOP, saving employee time.

Education

Ph.D Economics	**University of Houston** (UH), Houston	2026
M.Phil Economics (ABD)	**Delhi School of Economics**, New Delhi	2021
M.Sc Economics	**Symbiosis School of Economics**, Pune	2015
B.A Economics	**University of Madras**, Chennai	2013

Fields: Time Series Econometrics, Macroeconomics, Finance

Additional coursework during Ph.D:

- Micro-credential in Data Science (UH Data Science Institute)

Awards and Fellowships

Best PhD Workshop Presentation Award from Dept. of Economics at UH	2025
Teaching Award from Dept. of Economics at UH	2025
People's Choice Award at UH's 3-minute thesis competition	2024
Junior Research Fellowship from Govt. of India, awarded to less than 0.05% of applicants	2019-20
Distinction for B.A degree, received by 2 students in a class of 130 graduates	2013

Coding

- **R** - Time series analysis, data visualization. Built web-based dashboard in **RShiny** that lets users visualize IMF data on capital flows.
- **Python** - numpy, pandas, matplotlib, scikit-learn. Built app to creates a calendar schedule from a to-do list.
- **MATLAB** - Monte Carlo simulations, Numerical methods for solving systems of differential equations, Panel Data regression
- **Stata** - Forecasting and ARIMAX modeling, Panel Data Analysis, API Querying, Data cleaning and visualization.
- **Agentic AI** - Created Codex agents to create lecture slides and assessments.
- **Microsoft Office** - Excel: Lookup functions, Pivot tables, Data Visualization. Word, Powerpoint.

Research Papers

Impact of Foreign Ownership of Bonds on the Mexican Yield Curve
Estimated Nonparametric kernel weighted **Time-Varying Parameter VAR** and **SURE-IV** used to show that inflow of foreign capital to Mexican government bonds results in a trade-off; 27bps lower long term yields and 20bps lower monetary policy transmission to the yield curve. Empirical results are explained with a theoretical model of financial markets with heterogeneous financial intermediaries.

Impact of India's Special OMOs on the yield curve: An intervention analysis and event study
Intervention Analysis (an event study technique) finds that the slope of the Indian government bond yield curve had a cumulative reduction of 80bps from multiple 'Special Open Market Operations' by the Indian central bank.

Policy Rule Evaluation for the Fed's Strategy Review, (joint with David Papell & Swati Singh)
We propose two new monetary policy rules that are asymmetric and time consistent, and run **Monte-Carlo simulations** on the Federal Reserve's model of the US economy to show that our rules perform better than traditional Taylor rules and Shortfalls rules.
